

The Treasure Trail starts here ...

In all, the infamous Captain Kidd laid ten traps to catch would be treasure hunters. Each one gets more and more difficult. If you are slow, or faint-hearted don't bother. The aim is to defuse the bombs in each area of the trail. You only have so much time before they go off. Mind out, don't touch any of the Skull and Crossbones as that means certain death. To defuse the Bombs simply pass over them. You can scroll the screen sideways but not vertically. As for the Boots, well enough said, just try and see what happens if you get too close. By the way – they are intelligent, but they can be trapped.
