

AGENDA

Thierry
BALINT

Agenda vous propose la gestion de votre emploi du temps. Combien de fois n'avez vous pas pensé : j'aurais dû marquer cela quelque part... Seulement, depuis que vous utilisez votre ordinateur, plus question de toucher un morceau de papier ! Alors voici la solution pour ne rien perdre sur un CPC.

Un fichier généré par Agenda (AGD) est constitué de trente et une fiches à seize champs pour chaque journée. Le fichier représente ainsi un mois de données.

Possibilité vous est offerte, en sauvegardant divers fichiers, d'établir votre Agenda annuel (ex: JANVIER.AGD, FEVRIER.AGD, etc).

Dans le premier menu, vous devrez définir vos préférences : changer les couleurs de votre écran, décider du jeu de caractères que vous utiliserez parmi 5 possibles ; ceci afin de personnaliser votre travail. C'est de là que vous accéderez au second menu qui sera le programme principal.

Agenda est muni de toutes les directives et des messages d'erreurs afin de progresser dans le programme.

Attention : pour les utilisateurs de 464, il faut enlever l'instruction CLEAR INPUT à la ligne 580 pour que tout fonctionne très bien.
