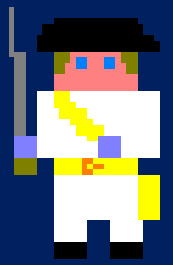
# Introduction



Good morrow, stranger and pray pardon me.

May I say a few words to you before you accompany me to battle?

Where are my manners? let me introduce myself, William Barret, soldier.

You are far from home, lad, this is the 18th century. Stay close and be of help to me so we can come back home to our family.

## Requirements

To battle by my side, you should use an AMSTRAD CPC computer, but don't worry if you don't have one of youse. Winape simulator will allow you to play this game.

http://www.winape.net/

You can also find tutorials on how to install Winape in different operative systems at "Profesor Retroman" youtube channel.

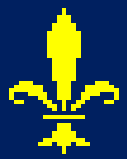
# How to Play

Here we are my friend, in the middle of the battleground. Let me give you some tips to survive.

Screen:

Health indicator:



Start with 3 lys flowers. Each time you get hit by a bullet, you will lose one.

If you run out of flowers, the battle is over.

Score: Shoot the enemies to increase the score.

Game Controls:

| | |
|---|---|
| A | Move left |
| D | Move right |
| SPACE | Fire your flintlock |
| R | If you lose, you can reload the game hitting this key |

Flintlock can only be loaded with a bullet at a time and it takes some time to be done. Take that into consideration when shooting, because afterwards you won't be able to shoot again until the bullet disappears from your sight.
