

CATEDIT

Valable pour CPC
464 - 664 - 6128

CATEDIT est un éditeur de catalogue bien plus puissant et maniable que celui de Discology 6.0 et en plus il ne fait pas d'erreur pour le transfert fichier car il réécrit complètement le catalogue.

Mais attention, ce n'est pas un copieur car il ne copie pas les programmes du commerce mais seulement les fichiers : c'est un éditeur de CATALOGUE un point c'est tout !

Quelques précisions sur le logiciel :

R/O Read Only : que l'on peut lire seulement

R/W Read write : que l'on peut lire et écrire

SYS : fichier caché au directory

DIR : fichier apparaissant au directory

Voici comment procéder à la création de CATEDIT.

- Taper et sauvegarder les fichiers Basic CAT, CAT0, CAT1, CAT2, CAT3, CAT4 et CAT5.

- Puis taper les ordres suivants :

RUN "CAT0" : crée sur le disc le fichier CATEDIT.BI0

RUN "CAT1" : crée sur le disc le fichier CATEDIT.BI1

RUN "CAT2" : crée sur le disc le fichier CATEDIT.BI2

RUN "CAT3" : crée sur le disc le fichier CATEDIT.BI3

RUN "CAT4" : crée sur le disc le fichier CATEDIT.BI4

RUN "CAT5" : crée sur le disc le fichier CATEDIT.BI5

Puis, une fois les 6 fichiers binaires créés, entrer RUN "CAT". Celui-ci va charger les 6 fichiers ci-dessus et les sauvegarder en 1 bloc nommé CATEDIT.BIN.

Le fichier binaire CATEDIT.BIN est un programme de 21 Ko qui est exécutable directement par RUN "CATEDIT" si tout fonctionne correctement, on peut alors effacer les fichiers CAT0, CAT1, CAT2, CAT3, CAT4, CAT5, CAT ainsi que les 6 fichiers binaires (CATEDIT.BI0 à BI5).

CATEDIT est fin prêt à l'utilisation.

- Quand on change de disquette, toujours faire "autre disk".

- Après modification du CATALOGUE, toujours faire "sauver Mod".

- Déplacez le curseur en vidéo inverse avec les flèches et validez avec ENTER, RETURN, COPY, SPACE ou encore TAB (là au moins on a le choix !).

- Les touches "A" et "B" déterminent le lecteur.

- La touche "U" permet de changer les USER.

- La touche "O" permet une fenêtre d'option (les touches "C", "P" et "B" déterminent les couleurs et "L" pour le lecteur destination).

- A tout moment, si on entre dans une option ou si l'on valide un ordre par erreur, on peut revenir au menu par ESC. Attention, si on fait ESC au menu, on fait un reset (retour Basic).

- L'option "Précision" sert à tout savoir sur des fichiers (début, longueur, exécution et nom de sauvegarde avant un REN par exemple).

- "Retrouver" sert à récupérer des fichiers effacés.

- CATEDIT fait un catalogue classé alphabétiquement et tout users confondus. Il ne fait pas l'erreur de mettre 2 fichiers avec le même nom (il crée les .BAK).

- CATEDIT a un buffer de copie de 39 Ko sur 464 et de 109 Ko sur 6128.

- CATEDIT est beaucoup plus puissant que Discology pour la copie fichier, et plus rapide.

- Il possède ses propres routines d'accès disc et il est capable de lire et recopier des fichiers même si ils faisaient des "Read Fail" sous Basic. En copiant un fichier, vous pouvez donc supprimer les "Read Fail" éventuels.

- CATEDIT détecte toutes les erreurs disc. Si, pendant la copie, il y a une erreur, il vous dit dans quel fichier elle se trouve. Si CATEDIT dit "Erreur inconnue" c'est que votre disquette est défectueuse (en HARD WARE).

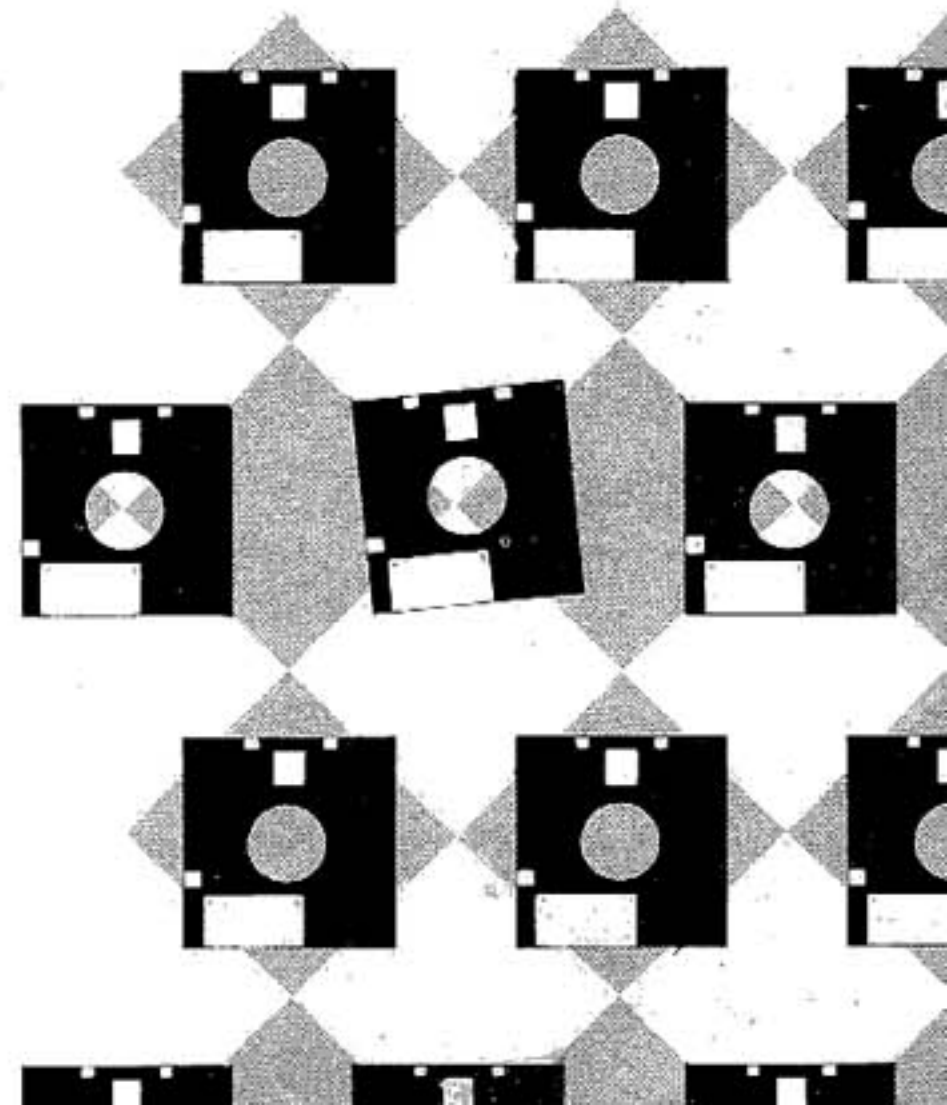

- Pour sélectionner un fichier, presser espace. Si vous pressez COPY, tous les fichiers sont sélectionnés.

- En-dessous de la fenêtre du catalogue est indiqué le type de formatage de la disquette en cours, le nombre de fichiers et la place restante.

- Lors de la "copie fichier", après la sélection, dans la fenêtre du bas est indiqué la place nécessaire sur le disc destination.

Contrairement à Discology, CATEDIT indique tout de suite, AVANT de copier, si il n'y a pas assez de place sur la disquette.
